Aarhus Batch Inversion releasing soon

Workbench 5.9 is for release soon, and it will include Aarhus Batch Inversion (ABI) and will replace our existing inversion process tool.
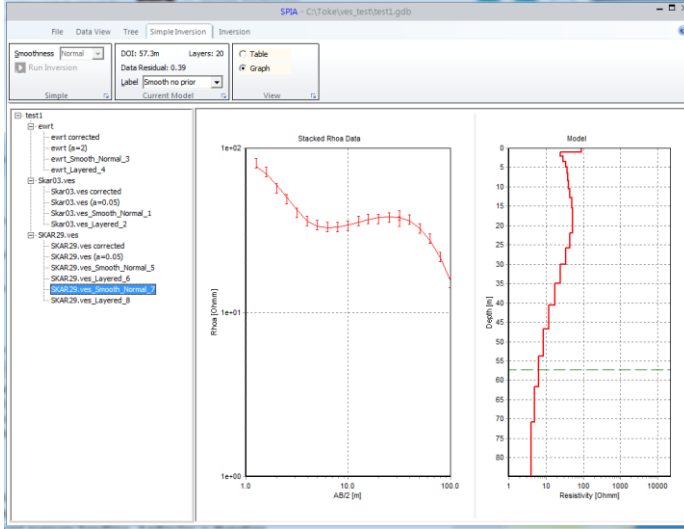

With ABI it will be possible to use servers and other available PC's in your network for inversions from Workbench. ABI has several features:

- Built-in queuing system. See inversion name, user name, number of CPU's, inversion type, queue time, run time, server name and number of models for the inversion jobs in queue.
- Select all or specify servers for the inversion job.
- Select number of CPU's needed for the inversion job and the queue system will automatically use the first server/PC with the available number of CPU's.
- Set time intervals for when a server/PC is available. With this function, normal office PC's can automatically be used for inversions after working hours.

ABI comes in a limited free version, a standard version and a pro version. More information will come with the release early 2019.

Free SPIA DC

Our SPIA DC software is available for free for 6 months from today and in all 2019. So, if you want to try it or need it for a project, contact us for a free license.

New updates for Res2DInv and Res3DInv

Res2DInv and Res3DInv has been updated with a few bug fixes. See release log for all details.

To get the newest updates, open the software and follow the update instructions or download the new installers from our webpage.

Update your Geotomo software

From 2019 the update and support fee for Geotomo software will increase if the support date is more than one year old. If updates are done in 2018 it will only cost one year of update fee no matter the age of the support date (USB dongles only). Contact us for updates.

Conferences and workshops

SAGEEP – Portland, March 2019
EAGE GSM – Kuala Lumpur, April 2019
- ERT/IP workshop with Dr. Meng Heng Loke - https://events.eage.org/en/2019/eage-gsm-nsge-2019/technical-programme/short-course/sc-1

EXPOGEF – Rio de Janeiro, August 2019
AEGC – Perth, September 2019
EAGE Near Surface – The Hague, September 2019
SAGA – Durham, October 2019
- Airborne workshop - http://sagaconference.co.za/workshops/
