

AGS NEWSLETTER

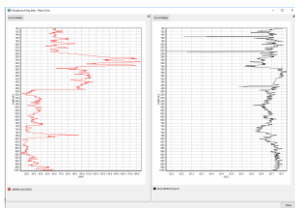

2017 ERT/IP campaign price

For the remaining of 2017 the **ERT/IP modules** are priced together at 2500 euro including a year of updates and support. [Contact](#) us for more trial license or more details.

New development

A new release of **Aarhus Workbench** will come end July, where we have focused on new airborne features and adding geophysical logs to sections.

In August, we will start on a new **Airborne IP module**, to invert for IP-effects in airborne TEM data.

Aarhus SPIA will have a big release on the fall where some of the features are support for x/y component receivers and the new L1-norm (blocky) inversion.

Conferences 2017

Aarhus GeoSoftware will be represented at:

- EAGE Near-surface – Malmø, September
- SAGA – Cape Town, September
- BGS2017 – Antalya, November
- AGU – New Orleans, December
